

Fuzzy Math (Hard Mode)

Fuzzkin Fun Fact #44: Upon arriving on Earth, the Fuzzkins had to learn how to use our standard base 10 system! It was the first of many puzzles they've conquered in the course of their adventures.

We've counted those "many" puzzles, actually. Turns out the exact number is 325. But that's irrelevant; hurry up and get the passphrase so we can get in their base.

$$EDD + QAE = SDE$$

$$EMD - TGH = RZE$$

$$AB * SL = VCB$$

$$AAA / AS = DN$$

$$SE * WN + ENM = ?$$
