

# Inman Square

# Two-Tone

Answers in this puzzle are read in a clockwise path marked by the bold lines. However, some entries only use the red squares, some entries only use the gray squares, and some entries use all the squares. To make matters worse, you must figure out which answers are in each group. Additionally, some letters will be entered so that they cover two consecutive squares. When you have filled in the grid, each square will be used in exactly two answers.

1. Seventh-degree polynomial
1. Cumin or cinnamon
