

SABOTAGE!

These jokers have gotten so angry at each other that they've sabotaged each other. They've changed puzzle text, and stolen and hidden important information. **(In two cases, they even destroyed a puzzle entirely! Alas, you'll have to backsolve those.)** We have been so busy putting out fires (figurative *and* literal ones) that we haven't been able to reconstruct everything that was destroyed or altered. You're going to have to do your best with what you've got and in doing so help bring an end to the conflict. Sorry, we did our best.

You can get Ether's meta puzzle when you have **two** answers on this answer sheet.
