

BAPHL 21 Errata:

We apologize for the errata present in our puzzles. We have chosen to preserve the puzzles as they were on the day of the solve and create a separate document, to create as identical a solving scenario as possible for future players.

Computing:

- List 8 should have an "N" after the letter chain "BIA."
- List 10 should have an "S" after the letter chain "BY."

Mathematics:

- The instructions and numbering on this puzzle were, on the whole, very off. The math *is* solvable, but it is confusing.

Vocabulary (Language Arts Meta):

- One of the "phony" lists was left off the first page of this puzzle. The enumerations for that list are as follows:

List Nine:

- 10/C**
- 6/F**
- 8/H**
- 5/M**
- 6/T**

- The "E" crossing in Row 22, Column 2 is necessary for the solution, but makes one of the entries at that cross misspelled.
- The "B" beginning the answer in Row 30, Column 7 should cross one other answer, but does not. That "B" is part of the solution hint phrase.
