

SOLUTION

CIRCLES

The puzzle is a representation of the playground located at Greene-Rose Heritage Park; the hunt's starting location.

The height and labelling of each pole allows values to be assigned to particular regions of the playground.

These values allow the solver to decompose the playground's regions into the sum of overlapping circles.

In roughly top-down, left-to-right ordering, the values of each circle spell the answer **TICTACS** alphanumerically.
