

Symbols of Strength – Solution

Authors: Dan Katz, Jackie Anderson

The descriptions refer to tiles found in the 9/11 memorial near Waterplace Park. This memorial contains many 4x15 panels of tiles; the first twelve tile descriptions refer to tiles on six panels. Their locations within the panels are given to make them easier to find, and two per panel are given to help confirm right answers.

Once those six panels are located, the other twenty-four descriptions refer to other tiles on those same six panels. The list consists of some tiles on the first panel, then the second panel, and so forth, although the jumps between panels are not given (since knowing how many tiles were on a panel would make it much easier to guess letter shapes without finding the tiles).

Connecting the tiles in clue order gives a letter on each panel. These letters, again in clue order (which is also the panel order in the first clue set), spell the answer, **SINEWY**.
