## Contestants' Row (Solution)

This puzzle takes the form of a quiz show. There are three rounds of fourteen Fuzzkin trivia questions, many of which you won't be able to answer because the show doesn't really exist. But, there is a way to figure out what's going on: each question either flat-out mentions or references the events of one particular episode in the episode guide. If it falls in season 1, the correct answer is A, if in season 2, the correct answer is B, and so on. Then, look at where the episode falls in the season, in terms of where it aired, and take that letter from the correct answer.

For example, the first question is: "Quizzo refuses to eat any pizza which contains this common topping." The only episode that makes any reference to pizza is "I'm at the Pizza Hut", the 10th episode of season 2. That means that the correct answer is B, "green peppers". The tenth letter of that is E.

If you do this for all the puzzles in any given round, you get the answer, ECONOMICS PRIZE. (There are three rounds to help participants get the correct answers, so they have a better shot at figuring out the answer gimmick.)
