

Welcome to BAPHL X! Well, sort of. You see, BAPHL's not actually being held here. It turns out that BAPHL 9 was such a big success in Providence that other cities have decided that they want to host a BAPHL too. Over 20 cities across the country have put in bids to host BAPHL, and out of those cities, the Bostonian Association of Picking Hunt Locations has chosen three finalists. Your job is to visit those cities and see whether each might be a good fit for BAPHL. Each finalist city will have four puzzles plus a metapuzzle, and the solution to that metapuzzle will be an evaluation of that city — a short phrase explaining why that city might or might not be a good fit for hosting BAPHL. You can see the full list of candidate cities on your local map, and the finalist cities are...

Oops! It appears that, due to a clerical error, we have forgotten the names of the three finalist cities. But don't despair: in your packets you should find a plane ticket to one of those cities. Use your ticket to — what? Oh, dear. Apparently there was a problem with the shredder, and let's just say your tickets have gotten a little... mixed up. You will need to find two other teams to work with, and between the three of you, you should be able to assemble all three tickets. Then you will be able to figure out what cities you need to visit, each team taking one of three tickets. Please confirm your destination with the staff, and then you can pay a visit to your first finalist city. Once you have evaluated each city, check in with the staff there, who will direct you to your next city. After evaluating all three, return here for more information for comparing the evaluations and coming to a final decision, so that you can answer: where will BAPHL X be held?

## Candidate Cities

*The following cities have put in bids to host the next BAPHL. Assemble your plane tickets to determine which three cities are the finalists, and visit those cities for more information.*

**Hunt Start Code:** Enter the first letters of the three finalist cities, in alphabetical order.
