

Space Needle (META)

*While checking out Seattle as a potential puzzle hunt site, you took some Instagrams. You were hoping to get some shots from the Space Needle, but that didn't happen. You also wanted to use filters appropriate for the Space Needle, but you had to make do with what was available. And even though hashtags **initially** seemed fun, you realize they're pointless in the end. Still, maybe these will help you determine if Seattle would be the right city to hold our summer puzzlehunt: a SAPHL!*
