

Instructions for assembling the Advent Calendar:

- 1) Print out pages 2 and 3 on cardstock, with page 2 printing in color. (Cardstock is preferred but not necessary.) Page 4 prints on plain paper. (You can get away with just printing the color page in black and white if you want, but you may need to refer to the color version on a digital device in case you need help making things out.)
- 2) Using a razor (or scissors if you're handy with them), only cut along the three lines (top, right side, and bottom) for each of the 25 windows/doors on the color page so each that each can be opened like a door.
- 3) Glue or tape the color page on page 2 on top of the black and white page of bigrams on page 3, taking care not to glue any of the windows/doors shut.
- 4) After successful completion of this Christmas Meta, the team then receives page 4 with the snowflakes on it which then gets taped to the front of their Advent Calendar.
