

BAPHL15 Solution: In The Right Place At The Right Time

Author: Henry Wong

Each of the grids can be unscrambled into a set of 4 related words or phrases.

Each of the sets has an ordering from earliest to latest.

If we rearrange the cells so that they are in the correct order, one square (containing one letter) does not change place. It's "in the right place at the right time".

Each of those letters is in a unique location in the 4x4 grid. If we write out the new grid we get:

A	N	S	W
E	R	I	S
B	A	B	Y
G	I	R	L

So the answer is BABY GIRL
