

*Welcome to Kendall Square! Have some puzzles!*

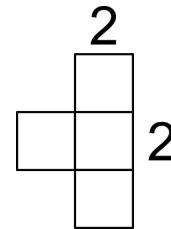

**Circle, Triangle, Square**

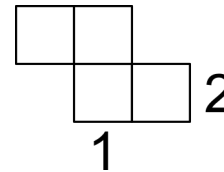

**Hollywood Squares**

**Music of the Spheres**

**Squaring the Square**

**Skyscrapers:** Place the digits 0, 1, 2, and 3 into the grid, one digit per cell, so that each row contains the digits 0, 1, 2, and 3 once each, as does each column. Numbers outside the grid represent the number of “buildings” that can be seen in the grid from that vantage point; a building is visible in a particular direction if its number is greater than 0 and there are no larger numbers between it and the vantage point. For the final metapuzzle, puzzle answers from Kendall Square should be placed in the squares that contain the digit 0.
