

Kakurogue (SOLUTION)

First, solve each Kakuro grid. In each grid, you'll find a single 9-number clue that uses the numbers from 1 to 9. This allows you to determine which numbers map to which letters. For example, in the BAG OF TRIX answer, B = 3, A = 1, etc.

Three squares in each grid have small numbers from 1 to 12 in the top left. Place the appropriate letters in those spots to spell out the Kakurogue's objective: **TAKE THE CROWN**.
